

Men's Mental Health Project in Hastings Grants (£500-£1500)

Application Guidance

The grants provided by the Men's Mental Health Project are designed to help individuals, groups and communities in Hastings to support the mental health of men, particularly between the ages of 30-59 years and living in deprived wards including Baird, Tressell, Castle, Central St Leonards and Hollington. The fund should be used to create positive changes by growing ideas, developing new projects or strengthening existing projects to support men's mental health. For example, the fund could be used by a current group to start a new group specifically for men, or by an individual or group to purchase equipment or invest in training to start a new activity for men in Hastings. We are simply looking for brilliant ideas for projects, initiatives, activities or events that will build positive change by raising awareness for men's mental health and supporting men to look after their mental wellbeing.

Additional Guidance:

Discuss your idea with any collaborators and/or potential men that the project or initiative is aimed at. This is important to further develop your idea and clarify your aims and intentions. Furthermore, discussing the idea with men that the project/initiative is intended for will assist your application by identifying their needs and supporting this within your plan. Additionally, it provides an opportunity to gauge interest and engagement.

As part of the Men’s Mental Health Project, MiBH has recently successfully completed engagement work with men in Hastings. The findings have been used to develop the criteria outlined above and to identify themes within the word cloud, demonstrating what men in Hastings would like. We are happy to discuss our findings in more detail with potential applicants for the purpose of refining ideas and meeting the identified needs of men in Hastings.
